

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons for this increase. First, the world population has increased from 5 billion in 1987 to 6 billion in 1997, and is projected to reach 8 billion by 2025 (FAO 1996). Second, the world population is becoming increasingly urban, and urban populations are growing faster than rural populations (FAO 1996).

Third, the world population is becoming increasingly aged, and the aged population is growing faster than the young population (FAO 1996). Fourth, the world population is becoming increasingly educated, and the educated population is growing faster than the uneducated population (FAO 1996).

Fifth, the world population is becoming increasingly mobile, and the mobile population is growing faster than the stationary population (FAO 1996). Sixth, the world population is becoming increasingly diverse, and the diverse population is growing faster than the homogeneous population (FAO 1996).

Seventh, the world population is becoming increasingly urbanized, and the urbanized population is growing faster than the rural population (FAO 1996). Eighth, the world population is becoming increasingly aged, and the aged population is growing faster than the young population (FAO 1996).

Ninth, the world population is becoming increasingly educated, and the educated population is growing faster than the uneducated population (FAO 1996). Tenth, the world population is becoming increasingly mobile, and the mobile population is growing faster than the stationary population (FAO 1996).

Eleventh, the world population is becoming increasingly diverse, and the diverse population is growing faster than the homogeneous population (FAO 1996). Twelfth, the world population is becoming increasingly urbanized, and the urbanized population is growing faster than the rural population (FAO 1996).

Thirteenth, the world population is becoming increasingly aged, and the aged population is growing faster than the young population (FAO 1996). Fourteenth, the world population is becoming increasingly educated, and the educated population is growing faster than the uneducated population (FAO 1996).

Fifteenth, the world population is becoming increasingly mobile, and the mobile population is growing faster than the stationary population (FAO 1996). Sixteenth, the world population is becoming increasingly diverse, and the diverse population is growing faster than the homogeneous population (FAO 1996).

Seventeenth, the world population is becoming increasingly urbanized, and the urbanized population is growing faster than the rural population (FAO 1996). Eighteenth, the world population is becoming increasingly aged, and the aged population is growing faster than the young population (FAO 1996).

Nineteenth, the world population is becoming increasingly educated, and the educated population is growing faster than the uneducated population (FAO 1996). Twentieth, the world population is becoming increasingly mobile, and the mobile population is growing faster than the stationary population (FAO 1996).

Twenty-first, the world population is becoming increasingly diverse, and the diverse population is growing faster than the homogeneous population (FAO 1996). Twenty-second, the world population is becoming increasingly urbanized, and the urbanized population is growing faster than the rural population (FAO 1996).

Twenty-third, the world population is becoming increasingly aged, and the aged population is growing faster than the young population (FAO 1996). Twenty-fourth, the world population is becoming increasingly educated, and the educated population is growing faster than the uneducated population (FAO 1996).

Twenty-fifth, the world population is becoming increasingly mobile, and the mobile population is growing faster than the stationary population (FAO 1996). Twenty-sixth, the world population is becoming increasingly diverse, and the diverse population is growing faster than the homogeneous population (FAO 1996).

Twenty-seventh, the world population is becoming increasingly urbanized, and the urbanized population is growing faster than the rural population (FAO 1996). Twenty-eighth, the world population is becoming increasingly aged, and the aged population is growing faster than the young population (FAO 1996).

Twenty-ninth, the world population is becoming increasingly educated, and the educated population is growing faster than the uneducated population (FAO 1996). Thirtieth, the world population is becoming increasingly mobile, and the mobile population is growing faster than the stationary population (FAO 1996).
